

Health Policy

Aurora's PG College (MCA), Nampally believe that academic success starts with physical well-being. To support this, the college frequently hosts on-campus health clinics in partnership with leading healthcare professionals. These sessions offer our community access to routine check-ups and expert medical advice, all designed to encourage early detection and mindful living. It's our way of ensuring every member of our college has the tools they need to stay healthy and informed.

This initiative is designed to promote health awareness and community service among both students and staff members.

The health camp offers a wide range of diagnostic services to ensure the physical well-being of the college community. Professional medical teams conducted thorough eye checkups, dental examinations, and vital health screenings, including blood pressure and diabetic tests. Additionally, the camp provided specialized ECG tests to monitor cardiac health, ensuring that participants received a holistic assessment of their current medical status.
