

RESEARCH AND DEVELOPMENT CELL

Ref No. APGCN/2024-25/RDC/03`

Date 06/09/2024

The Research and Development Cell (RDC) is a key unit of the college committed to promoting research, innovation, and academic development. It strives to strengthen the institution's research capabilities by encouraging faculty and student research initiatives. The cell also facilitates collaboration with industries and external organizations through consultancy and research partnerships, thereby contributing to the overall academic and professional growth of the institution.

OBJECTIVES OF THE CELL

- **Promote Research Activities:** Encourage and support research initiatives among faculty and students by providing necessary resources, guidance, and funding opportunities.
- **Manage Grants and Funding:** Assist in identifying, securing, and effectively managing research grants and funding opportunities from external agencies and organizations.
- **Foster Collaborations:** Establish and strengthen partnerships with academic institutions, industries, and research organizations to enhance research capacity and outcomes.
- **Support Publication and Dissemination:** Facilitate the publication of research findings in reputed journals and promote their dissemination through conferences, seminars, and other academic platforms.

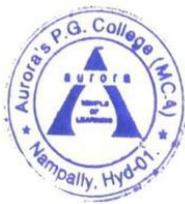

List of Members

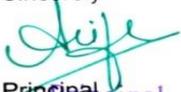

S.No	Name	Desigantion	Position
1	Dr. Arifa Begum	Professor	Coordinator
2	S. Vijaya Sree	Professor	Member
3	Dr. K. Sunanda	Associate Professor	Member
4	CH. Vasantha	Associate Professor	Member
5	P. Ramprasad	Assistant Professor	Member
6	S Vijaya Laxmi	Assistant Professor	Member

RESPONSIBILITIES OF THE CELL

- Promote and facilitate research activities by providing essential resources, guidance, and support for faculty and student research initiatives.
- Assist faculty members in the preparation and submission of research grant proposals and oversee the effective administration of funded research projects.
- Establish and strengthen collaborations with academic institutions, research organizations, and industry partners to enhance research opportunities and outcomes.
- Support the development of innovative research projects through idea generation, proposal development, and effective project management.
- Organize workshops, seminars, and training programs on research methodologies, grant writing, and best research practices to enhance research skills and capacity among faculty and students.
- Encourage and facilitate the dissemination of research outcomes through publications in reputed journals, presentations at conferences, and participation in seminars to increase the visibility and impact of research activities.

The Research and Development Cell (RDC) plays a significant role in strengthening the research ecosystem of the college. By promoting research initiatives, supporting grant acquisition and management, and fostering collaborations with industry and academic institutions, the RDC contributes to the overall academic growth and innovation of the institution. Its initiatives help cultivate a vibrant research culture while expanding consultancy and industry engagement opportunities that benefit both the institution and the wider community.
